

**At 4-months
old she
is alone
and
pregnant.**

Don't make more Fix by month 4

- A female cat can begin breeding at 4-months old.
- A female cat can go into heat while she is still nursing a litter.
- An unfixed male cat can be responsible for 100s of litters in one year.
- Your unfixed cat is adding to the tragedy of pet overpopulation.
