Get the facts

ABOUT CATS...

A female cat can begin breeding as young as 4 months old

A cat can become pregnant again while still nursing a litter

$$\text{Cat} + \text{Cat} \times 7 \text{ YEARS} = 420,000 \text{ CATS}$$

One unaltered female cat and her off-spring can produce over 370,000 cats in only 7 years.

ABOUT DOGS...

A female dog can begin breeding as young as 6 months old

80% of the dogs hit by cars are unaltered males searching for mates.

$$\text{Dog} \rightarrow \text{Litter} \times 6 \text{ YEARS} = 67,000 \text{ DOGS}$$

One unaltered female dog and her off-spring can produce 67,000 dogs in only 6 years.

STOP THE CYCLE. SPAY/NEUTER YOUR PETS.
